

GRIGLIO, oasis of peacefulness

GRIGLIO is a self-blocking mattress for bed used with sand.

**Hollow...
that's enough!**

Choose GRIGLIO!!

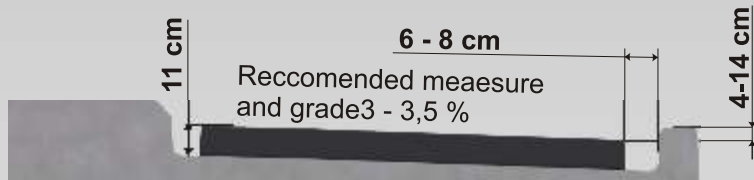

- Avoid problems of sand leakage from the bunk. Reduction to the minimum of restoration interventions with consequent discount on maintenance costs .
- It avoid formation of hollow due to the animals, so the bunk results comfortable and clean
- Full of sand it became a uniform base of inorganic material, chemically inert, soft and dry. Inalterable from physical and chemical point of view.
- You can keep the bunk with sand, straw and sawdust.

- Economic and easy to place in every kind of bunk for sand. You have just to fix it in correspondence of the fixing point using plug.

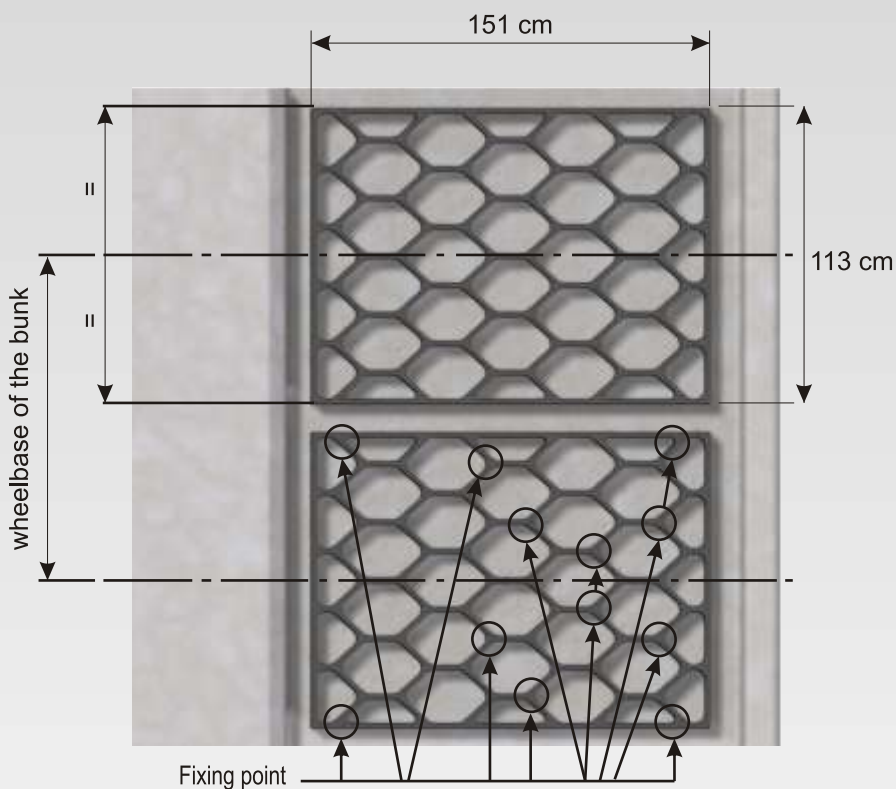

INSTRUCTION CARD

- Position GRIGLIO in the middle of the bunk away 6 - 8 Cm from the back edge (like in the scheme).
- Fix GRIGLIO in correspondence of the fixing point.
- Fill all the bunk with sand up to 6 -7 cm over.
- Keep the bunk full of sand, straw or sawdust.

Weight GRIGLIO 11 = 50 Kg

FIXING

Make n° 12 holes with a diameter of 8 mm.
Fix GRIGLIO using plug and keeping attention to the washer position.

MAINTENANCE OF BED

Griglio has the fuction to contain and for this reason it NEVER have to touch the animal.

Griglio has to be positioned on the base of bed and fixed in correspondence of the fixing point. Afterwards the bunk must be filled with sand up to 6 – 7 cm over (the best sand to use is the very compact one). Keep the bunk full of sand, straw or sawdust. A bunk with Griglio must be clean every week in order to control sand's level. Bed must be filled with sand whenever sand's level is low.
